Note:

Redesigned during production.

There are at least two different versions of instructions for this set. The differences for the second version are indicated in this inventory in the Alternate Items section with Match ID 99.

Quick overview of redesign: In the cockpit module various parts are added to strengthen the build. In the track assembly two black 3708 Technic, Axle 12 are replaced by four black 6558 Technic, Pin 3L with Friction Ridges Lengthwise, enabling the tracks on each side to move independently from each other.

There are numerical errors in the parts lists in the instructions for both versions of this set. The early version of the instructions incorrectly lists only one pair of minifigure legs, but two are included. It also lists 13 dark bluish gray 32291 Technic, Axle and Pin Connector Perpendicular Double, but only 12 were included. The later version of the instructions incorrectly lists one black 6558 Technic, Pin 3L with Friction Ridges Lengthwise, but 18 are included.

The dark bluish gray 32523 Technic, Liftarm 1 x 3 Thick in the later version of the set has also been found in dark gray. The black 6538b Technic, Axle Connector 2L (Ridged with x Hole x Orientation) have also been found in the set as 6538c Technic, Axle Connector 2L (Smooth with x Hole + Orientation).
